

# ATDD Class Setup

## Setup:

1. Go to the GitHub repository for the material used in the class:  
<https://github.com/leandog/atdd-tdd-typescript>
2. Download the entire repository by cloning it locally with Git. If you don't already have Git installed, no problem. Just download a ZIP version of the repository

3. Start Puppies project based upon root materials directory - \$WORK\_DIR

// Open Terminal

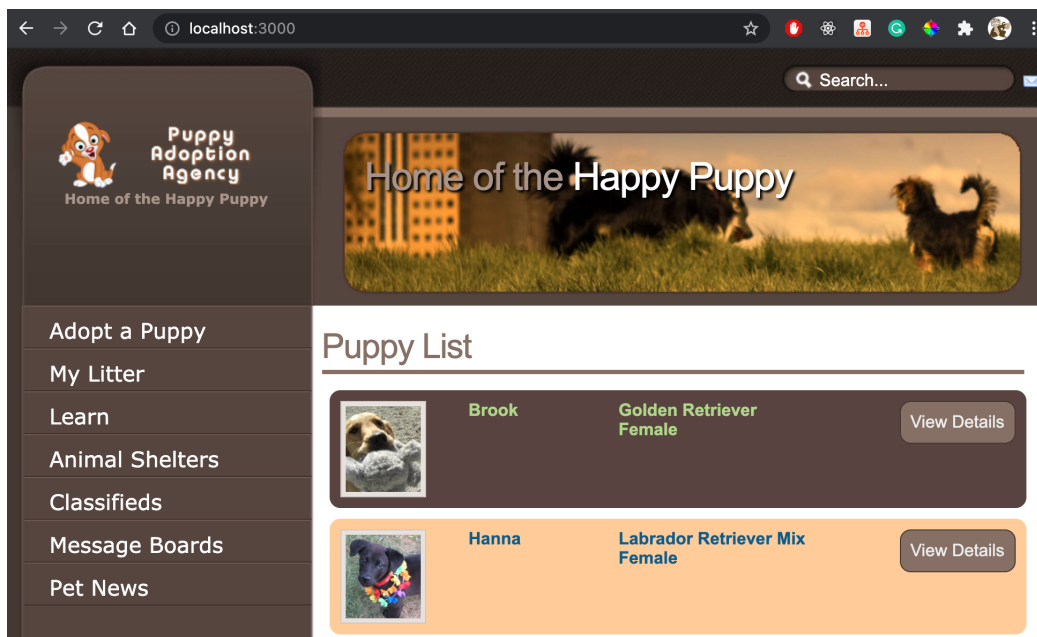

~ cd \$WORK\_DIR

~ cd puppies

~ docker-compose up

```
Creating rails-puppies ... done
Attaching to rails-puppies
rails-puppies | [2021-08-25 03:49:47] INFO WEBrick 1.3.1
rails-puppies | [2021-08-25 03:49:47] INFO ruby 2.3.3 (2016-11-21) [x86_64-linux]
rails-puppies | [2021-08-25 03:49:47] INFO WEBrick::HTTPServer#start: pid=9 port=3000
```

4. Use Chrome to visit Puppies site: <http://localhost:3000>

5. Celebrate! You are now ready for the class!
